Data Flow Diagram

Data Flow Description

The following steps describe the flow of data within the ServiceNow User Management System:

1. The System Administrator logs into the ServiceNow platform.
2. The administrator creates or manages users, groups, and roles.
3. User information is stored in the ServiceNow database.
4. Access Control Lists (ACLs) verify user permissions before granting access.
5. Flow Designer automates task assignments, approvals, and notifications.
6. Authorized users access project and task records based on their assigned roles.
7. Updates made by users are stored back in the ServiceNow database.

Simple Data Flow Diagram

User Stories

US-1 – User Creation

User: System Administrator

Story: As a System Administrator, I want to create user accounts so that employees can access the ServiceNow platform.

Acceptance Criteria:

- User account is created successfully.
- Required user details are stored.
- User can log in with assigned credentials.

Priority: High

Release: Sprint 1

US-2 – Group Management

User: System Administrator

Story: As a System Administrator, I want to create project groups and assign users so that teams can collaborate efficiently.

Acceptance Criteria:

- Groups are created successfully.
- Users can be added or removed.
- Group membership is updated correctly.

Priority: High

Release: Sprint 1

US-3 – Role Assignment

User: System Administrator

Story: As a System Administrator, I want to assign Project Manager and Team Member roles so that users receive appropriate permissions.

Acceptance Criteria:

- Roles are assigned successfully.
- Permissions match assigned roles.

- Unauthorized access is prevented.

Priority: High

Release: Sprint 1

US-4 – Access Control

User: Project Manager

Story: As a Project Manager, I want full access to project and task records so that I can manage project activities.

Acceptance Criteria:

- Project Manager can create, update, and delete records.
- Access restrictions are enforced for other roles.

Priority: High

Release: Sprint 2

US-5 – Task Management

User: Team Member

Story: As a Team Member, I want to view and update assigned tasks so that I can complete my project work efficiently.

Acceptance Criteria:

- Assigned tasks are visible.
- Status and comments can be updated.
- Restricted fields cannot be modified.

Priority: Medium

Release: Sprint 2

US-6 – Workflow Automation

User: System Administrator

Story: As a System Administrator, I want task assignments and notifications to be automated so that manual work is reduced.

Acceptance Criteria:

- Tasks are assigned automatically.
- Email notifications are sent.
- Approval workflow executes successfully.

Priority: Medium

Release: Sprint 3
