Customer Problem Statement Template

A **Customer Problem Statement** helps teams understand a customer's needs, challenges, and expectations from their perspective. It focuses on identifying the customer's goals, the obstacles they encounter, the reasons behind those challenges, and the emotional impact of those problems. Understanding the customer's viewpoint enables teams to design effective, user-centric solutions.

In this project, the Customer Problem Statement template is used to identify the challenges faced by ServiceNow administrators and end users while managing users, groups, roles, and access permissions. By analyzing these challenges, the team can develop an automated and secure solution that improves access control, streamlines workflows, and enhances the overall user experience within the ServiceNow platform.

I am	Who is the customer? Describe and list their attributes.
I'm trying to	What are they trying to achieve? List them here.
but	What are the issues or barriers that get in the way? Note them here.
because	Why do these issues or barriers exist? List them here.
which makes me feel	What do they feel as a result of these issues or barriers? Note the emotions here.

Example:

Problem Statement	I am	I'm trying to	But	Because	Which makes me feel
PS-1	ServiceNow Administrator	Manage users, groups, and roles efficiently	User access is assigned manually	There is no automated workflow	Frustrated due to delays and extra work
PS-2	Employee	Request access to required applications	The approval process is slow	Multiple manual approvals are required	Unproductive and dissatisfied
