Empathy Map Canvas

An **Empathy Map Canvas** is a visual tool that helps teams better understand users by exploring their thoughts, feelings, actions, and experiences. It enables teams to gain deeper insights into user behavior, identify pain points, and recognize opportunities for improvement. By understanding the user's perspective, organizations can design solutions that are more effective, user-friendly, and aligned with customer needs.

For this project, the Empathy Map Canvas is used to understand the experiences of ServiceNow administrators and employees while managing users, groups, roles, and access requests. The insights gathered help in designing a secure, efficient, and automated access management system that improves user satisfaction and organizational productivity.

The Empathy Map Canvas is a fish-shaped template used for gathering user insights. It consists of a central fish body divided into four quadrants, and a head with two eyes. The sections are numbered 1 through 7:

- 1 WHO are we empathizing with?**
 - Who is the person we want to understand?
 - What is the situation they are in?
 - What is their role in the situation?
- 2 What do they need to DO?**
 - What do they need to do differently?
 - What job(s) do they want or need to get done?
 - What decision(s) do they need to make?
 - How will we know they were successful?
- 3 What do they SEE?**
 - What do they see in the marketplace?
 - What do they see in their immediate environment?
 - What do they see others saying and doing?
 - What are they watching and reading?
- 4 What do they SAY?**
 - What have we heard them say?
 - What can we imagine them saying?
- 5 What do they DO?**
 - What do they do today?
 - What behavior have we observed?
 - What can we imagine them doing?
- 6 What do they HEAR?**
 - What are they hearing others say?
 - What are they hearing from friends?
 - What are they hearing from colleagues?
 - What are they hearing second hand?
- 7 What do they THINK and FEEL?**
 - PAINS**
 - What are their fears, frustrations, and anxieties?
 - GAINS**
 - What are their wants, needs, hopes and dreams?

Below the fish body, there is a line for additional notes: "What other thoughts and feelings might motivate their behavior?"

Example:

Empathy Map – ServiceNow User Management

 SAYS	 THINKS
• “I need quick access to the required applications.” • “Managing permissions manually takes too much time.”	• “There should be an easier way to manage user access.” • “Automation would reduce errors and improve efficiency.”
 DOES	 FEELS
• Submits access requests, manages users, groups, and roles, and follows approval workflows.	• Frustrated by delays, concerned about security, and satisfied when access is granted quickly and accurately.
  Example User: ServiceNow Administrator / Employee
