

Acceptance Testing UAT Execution & Report Submission

Date	
Team ID	
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	4 Marks

1. Purpose of the Document

The purpose of this document is to present the User Acceptance Testing (UAT) results for the **Optimizing User, Group, and Role Management with Access Control and Workflows** project. The testing was conducted to verify that all implemented features function correctly according to the project requirements. The report summarizes the testing activities, defects identified, and the final testing outcome before project completion.

2. Defect Analysis

During User Acceptance Testing, the implemented modules were tested thoroughly. A small number of issues were identified during development and were resolved before the final release. No critical defects remained after testing.

Defect Severity	Number of Issues	Status
Critical	0	Resolved
High	1	Resolved
Medium	2	Resolved
Low	2	Resolved

Total Defects Identified: 5

Total Defects Resolved: 5

Pending Defects: 0

3. Test Case Analysis

The following modules were tested during User Acceptance Testing.

Module	Total Test Cases	Passed	Failed
User Management	6	6	0
Group Management	5	5	0
Role Management	5	5	0
Access Control (ACLs)	6	6	0

Workflow Automation	5	5	0
Notifications	3	3	0

Total Test Cases: 30

Passed: 30

Failed: 0

The User Acceptance Testing confirmed that all major functionalities of the ServiceNow application operated as expected. User management, group management, role assignment, access control, workflow automation, and notification features were successfully validated. All identified defects were resolved before completion of the testing phase, and the application satisfied the functional requirements defined for the project. Based on the User Acceptance Testing results, the **Optimizing User, Group, and Role Management with Access Control and Workflows** project successfully meets its functional and security requirements. The application is stable, secure, and ready for deployment within the ServiceNow environment.
