Project Overview

Project Name: Optimizing User, Group, and Role Management with Access Control and Workflows

Project Description:

This project is developed on the ServiceNow platform to streamline the management of users, groups, and roles within an organization. It implements Role-Based Access Control (RBAC), Access Control Lists (ACLs), and workflow automation using Flow Designer to improve security, reduce manual effort, and enhance collaboration.

Project Version: Version 1.0

Testing Scope

The following functionalities were tested during User Acceptance Testing (UAT):

- User Creation and Management
- Group Creation and Management
- Role Assignment
- Access Control Lists (ACLs)
- Project and Task Record Management
- Workflow Automation using Flow Designer
- Email Notifications
- Role-Based Access Verification

Testing Environment

Platform: ServiceNow Developer Instance

URL/Location: <https://developer.servicenow.com/dev.do>

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	Create a new user	Navigate to Users → Click New → Enter user details → Save	User account is created successfully	User created successfully	Pass
TC-002	Create a new group	Navigate to Groups → Create a	Group is created successfully	Group created successfully	Pass

		new group → Save			
TC-003	Assign Project Manager role	Open User Record → Assign Project Manager role → Save	Role assigned successfully	Role assigned successfully	Pass
TC-004	Assign Team Member role	Open User Record → Assign Team Member role → Save	Team Member role assigned	Role assigned successfully	Pass
PassTC-005	Verify ACL restrictions	Login as Team Member → Attempt to edit restricted fields	Restricted fields cannot be modified	Access denied as expected	Pass
TC-006	Create Project Record	Open Project Table → Create new project → Save	Project record is created	Project created successfully	Pass
TC-007	Execute Workflow	Create a task and trigger Flow Designer	Workflow executes successfully	Workflow executed successfully	Pass
TC-008	Verify Email Notification	Complete workflow approval	Email notification is received	Notification received successfully	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Team Member could edit a restricted field before ACL update	Login as Team Member → Open Task Record → Edit restricted field	Medium	Closed	ACL configuration was updated and issue resolved

BG-002	Email notification delivery was slightly delayed	Trigger workflow approval	Low	Closed	Notification settings were verified and corrected
